Women Who Master — Individual GenAI Hackathon Submission

Submitted by: [Saranya K] | Registration/Roll number: [WWM26-BLR-G-T044-M04] | Location: [Bengaluru]

Theme:**Financial Resilience & Empowerment****Problem:**

Women can face financial uncertainty during emergencies and may not have simple, personalized tools to understand their financial resilience and identify areas that need attention.

Our Focus:

SakhiShield addresses this gap by using Generative AI to transform user-provided financial information into a simple and personalized **Financial Resilience Card**.

- **Primary User:** Women who need better financial preparedness and resilience.
- **Problem:** Many women may face unexpected financial challenges without a clear understanding of their financial strengths, vulnerabilities, or preparedness.
- **Current Situation:** Financial information can be complex and difficult to interpret, making it harder to identify practical steps for improving financial resilience.
- **Unmet Need:** A simple, accessible and personalized tool that helps users understand their financial resilience.
- **Success Outcome:** SakhiShield provides a clear **Financial Resilience Card** with personalized insights and actionable guidance, helping women make more informed financial decisions.
- This is **under 100 words** and directly covers the four things the template asks for: **who, what happens now, the gap, and the desired outcome**

- **SakhiShield is a Generative AI-powered financial resilience assistant designed to help women understand their financial preparedness and identify areas that may need attention.**
- The user provides relevant financial information through the PartyRock interface. The GenAI model processes the inputs using structured prompts and generates personalized insights about financial strengths, vulnerabilities and areas for improvement.
- The system presents these insights through a **Financial Resilience Card**, making the information simple, organized and easy to understand. The card provides a clear summary along with practical next steps that can help the user improve financial preparedness.
- **Core User Journey**
- **User Input → AI Analysis → Resilience Assessment → Personalized Guidance → Financial Resilience Card**
- **Key Features**
- Personalized financial-resilience assessment
- AI-generated insights and recommendations
- Simple, structured Financial Resilience Card
- Actionable next steps
- Easy-to-understand financial guidance
- **GenAI Capability:** Natural-language understanding, analysis and personalized content generation.
- **Prototype:** Built and tested using Amazon PartyRock.

GenAI Workflow / System Design

SakhiShield – Financial Resilience Card

Information Flow: User Input → Prompt & Instructions → GenAI Model → Processing & Validation → Financial Resilience Card (Output)

Initial development focused on establishing the core SakhiShield workflow and prototype.

The screenshot shows a web browser window with the URL `partyrock.aws/u/Saranyak/qjLm-Oh7/new-app-qjLm-Oh7`. The application is titled "WHISKERS" and displays a form for "new-app-qjLm-Oh7". The form includes several input fields with example values:

- Income:** → e.g. 35000 (your approximate take-home income per month)
- Other Monthly Expenses:** → e.g. 5000 (subscriptions, personal care, dining out, shopping)
- Current Savings:** → e.g. 50000 (approximate total savings across all accounts)
- Goal Timeframe:** → e.g. 6 months, 1 year, 3 years
- Existing Obligations or Debt:** → e.g. 15000 (rent, food, utilities, transport, medicines)
- Primary Financial Goal:** → e.g. 3000 (loan EMIs, credit card minimums, any regular debt repayments)
- Financial Experience Level:** Just starting out
- Relevant Constraints:** → e.g. Supporting family members, irregular income, no insurance, limited financial access — or write

On the left, there is a sidebar with a "PR" tab and a list of icons. The main content area includes a "Play App" button and a "Flow" toggle. The bottom of the screen shows a Windows taskbar with various application icons and the system clock indicating 10:11 AM on 08-08-2026.

Final Submission:

The screenshot shows a web browser window with the URL `partyrock.aws/u/Saranyak/qjLm-Oh7/SakhiShield/snapshot/6i7bZxkyS`. The application is titled "SakhiShield" and displays a "Financial Resilience Card". The card includes the following sections:

- 4. Protection Awareness: NEEDS ATTENTION**
 - Gap: No information about health/life insurance coverage
 - Risk: Medical emergency could wipe out your emergency fund
 - Action: Verify existing coverage within 30 days
- 5. Information Gaps: MODERATE**
 - Missing: Debt interest rates and terms
 - Missing: Breakdown of ₹4,000 "Other Expenses"
 - Missing: Insurance coverage details
 - Action: Complete information gathering in next 2 weeks
- YOUR TWO PATHS FORWARD**
 - PATH A: Emergency Fund First (RECOMMENDED)**
 - Timeline: 3 months to ₹63,000 emergency fund
 - Advantages:
 - Achieves financial security baseline quickly
 - Protects against forced debt if emergency strikes
 - Psychological win builds momentum
 - Aligns with your original 6-month goal (you'll finish in 3!)
 - Trade-offs:
 - Continue paying interest on ₹5,000 debt for 3 more months
 - If debt is high-interest (>15%), could cost ₹1,875-2,800 in extra interest
 - Best if: Your debt interest rate is below 12% OR you don't have any emergency savings cushion
 - PATH B: Debt Elimination First**
 - Timeline: Varies based on total debt amount (not provided)

The left sidebar shows a "Hello. I'm Whiskers." message with a cat illustration and a "Quick suggestions:" section. The bottom of the screen shows a Windows taskbar with various application icons and the system clock indicating 01:46 PM on 08-08-2026.

AI TOOL / PLATFORM - Amazon PartyRock

Used to build and test the SakhiShield Generative AI prototype and generate the Financial Resilience Card.

IMPORTANT PROMPTS:

- **Prompt 1 — Financial Resilience Analysis**

“Analyze the user's financial information and assess their financial resilience, identifying strengths, vulnerabilities and areas requiring attention.”

- **Prompt 2 — Card Generation**

“Present the assessment as a clear and structured Financial Resilience Card with personalized insights and practical next steps.”

- **Prompt 3 — Responsible Guidance**

“Provide clear, non-judgmental financial guidance based only on the information provided. Avoid unsupported assumptions and clearly distinguish general guidance from professional financial advice.”

PROMPT REFINEMENT

After reviewing the initial outputs, prompts were refined to:

Make responses **more structured and concise**

Improve **personalization** based on user inputs

Make recommendations **clearer and actionable**

Reduce unsupported assumptions

Improve the readability of the **Financial Resilience Card**

EXTERNAL DATA / API / REFERENCES

No external API, personal database or external data source was used in the prototype.

The system works primarily with **user-provided information and the GenAI model within PartyRock.**

INPUT:

 **Stage 1 – Financial Profile**

Fill in the fields below. Use approximate figures – precision is not required. Leave a field blank if you do not have the information.

⚠ Use approximate amounts only. Do NOT enter account numbers, PINs, passwords, OTPs, or bank credentials.

Monthly Income 35000	Essential Monthly Expenses 12000
Other Monthly Expenses 4000	Existing Obligations or Debt 5000
Current Savings 20000	Primary Financial Goal build an emergency fund
Goal Timeframe 6 months	Financial Experience Level Just starting out
Relevant Constraints Optional limited savings	

OUTPUT:

Financial Resilience Card

Your Complete Financial Journey Map

Based on your comprehensive financial assessment, here's your consolidated roadmap:

YOUR PRIORITY GOAL: Emergency Fund Completion

Why this comes first:

- You're already 32% of the way there (₹20,000 saved toward ₹63,000 target)
- With your ₹14,000 monthly surplus, you'll reach this goal in **just 3 months**
- This creates a safety net before tackling other goals
- Your 40% savings rate puts you ahead of most people your age

What happens after: Once complete, you can aggressively tackle your ₹5,000 monthly debt obligation or extend to a 6-month emergency fund (₹1,26,000)

YOUR RESILIENCE GAPS

1. Emergency Readiness: MODERATE

- Current Status:** ₹20,000 saved (covers ~1 month of expenses)
- Gap:** Need ₹43,000 more for 3-month cushion
- Action:** On track to close this gap in 3 months

2. Expense Pressure: HEALTHY

- Current Status:** 40% savings rate with ₹14,000 monthly surplus
- Strength:** Excellent financial discipline
- Watch:** The ₹4,000 "Other Expenses" needs tracking to prevent lifestyle creep

3. Goal Readiness: MODERATE

- Current Status:** Clear emergency fund goal, timeline ahead of schedule
- Gap:** Debt details unclear (₹5,000/month obligation needs analysis)
- Action:** Must determine if this is high-interest debt requiring immediate attention

Financial Resilience Card

4. Protection Awareness: NEEDS ATTENTION

- Gap:** No information about health/life insurance coverage
- Risk:** Medical emergency could wipe out your emergency fund
- Action:** Verify existing coverage within 30 days

5. Information Gaps: MODERATE

- Missing:** Debt interest rates and terms
- Missing:** Breakdown of ₹4,000 "Other Expenses"
- Missing:** Insurance coverage details
- Action:** Complete information gathering in next 2 weeks

YOUR TWO PATHS FORWARD

PATH A: Emergency Fund First (RECOMMENDED)

Timeline: 3 months to ₹63,000 emergency fund

Advantages:

- Achieves financial security baseline quickly
- Protects against forced debt if emergency strikes
- Psychological win builds momentum
- Aligns with your original 6-month goal (you'll finish in 3!)

Trade-offs:

- Continue paying interest on ₹5,000 debt for 3 more months
- If debt is high-interest (>15%), could cost ₹1,875–2,500 in extra interest

Best if: Your debt interest rate is below 12% OR you don't have any emergency savings cushion

Privacy & Consent:

Risk: Users may enter sensitive financial information into SakhiShield.

Safeguard: Collect only information necessary for the assessment, avoid requesting personally identifiable information, and clearly inform users how their information is used.

Bias & Exclusion:

Risk: AI-generated guidance may make assumptions about a user's income, lifestyle or financial circumstances.

Safeguard: Use inclusive, non-judgmental prompts and generate recommendations only from information provided by the user.

Inaccurate or Harmful Outputs:

Risk: The GenAI model may produce incorrect or unsuitable financial guidance.

Safeguard: Treat the Financial Resilience Card as informational guidance, validate important outputs, and recommend professional verification for significant financial decisions.

Security & Misuse:

Risk: Sensitive financial information could be exposed or the tool could be misused to make high-stakes financial decisions.

Safeguard: Minimize sensitive data collection and avoid presenting AI outputs as guaranteed financial advice.

EXPECTED SOCIAL IMPACT

- SakhiShield can help women:
- Understand their financial resilience more clearly
- Identify financial strengths and vulnerable areas.

WHO BENEFITS?

- **Women users:** Better financial awareness and preparedness.
Communities: Greater financial resilience and awareness.
Organizations: A scalable digital tool for financial-resilience awareness programs

- .

FEASIBILITY

- Prototype already developed using **Amazon PartyRock**
- Requires a digital interface and access to a GenAI service
- Can be deployed without specialized physical infrastructure
- Prompt refinement and testing can continuously improve the system

Multiple languages

- Different financial situations and user groups
- Integration with trusted financial-education resources
- Wider digital-access channels
